Final Office Action on the Merits of a RCE

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Status of the Application

2. Claims 57, 70, 71, 77 and 88 are pending in the present application. The instant claims stand rejected as indicated below.

Duplicate Claims

3. The objection to claims 60 and 72 under 37 CFR 1.75 as being substantial duplicates of claims 56 and 57, respectively is made moot by the cancellation of the instant claims.

Claim Objections

4. The objection to claims 69, 80 and 87 under 37 CFR 1.75(c), as being of improper dependent form is made moot by the cancellation of the instant claims.

Claim Rejections - 35 USC § 112

5. The rejection of claims 56, 58-61, 64, 66, 69 and 84 under 35 USC 112, first paragraph is made moot by the cancellation of the instant claims.

6. The rejection of claims 70 and 71 under 35 USC 112, first paragraph is withdrawn.

7. The rejection of claim 66 under 35 USC 112, second paragraph is made moot by the cancellation of the instant claim.

Claim Rejections - 35 USC § 103

8. The rejection of claims 56, 58-61, 64, 66, 69, 72, 73, 80-82, 84, 87 and 89 under 35 USC 103(a) over Mayhew et al. (US 5,580,899) is made moot by the cancellation of the instant claims.

9. The rejection of claims 57, 70, 71, 77 and 88 under 35 USC 103(a) over Mayhew et al. (US 5,580,899) is maintained.

Applicant argues the scope of the genus of compounds taught by the reference. Accordingly, applicant argues the skilled artisan would not have a reason to modify the known compound in a particular manner as recited by the instant claim to achieve therapeutically beneficial levels of a drug in a cell. Applicant's argument was considered but not persuasive for the following reasons.

As stated in the previous Office Action, Mayhew teaches taxane derivatives for use in treating cancers and exemplifies a C18 fatty acid derivative thereof:

. The difference between the exemplified prior art compound and the claimed compound is unsaturation in the 9-position of the exemplified C18 fatty acid. However, the reference teaches the use of saturated or unsaturated, aliphatic or branched fatty acids and, thus, the corresponding unsaturated fatty acids derivatives, such as, oleic and elaidic acids, are rendered obvious.

Applicant argues the skilled artisan would not have a reason to modify the prior art compound in a particular manner as recited by the instant claim to achieve therapeutically beneficial levels of a drug in a cell. However, Mayhew teaches the attachment of a hydrophobic organic moiety stabilizes the association of the taxane derivative with a lipid carrier in the plasma and, thus, provides motivation to make any of the species of the genus of taxane derivative of the reference, including those of the instant claims.

For these reasons and those given in the previous Office Action, the rejection of claims 57, 70, 71, 77 and 88 under 35 USC 103(a) over Mayhew et al. (US 5,580,899) is maintained.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
